

Vehicles with RFID-Inhibiting Glass

Starting Jan. 22, 2017, the Danforth University Center (DUC), Millbrook, Snow Way and West Campus garages have been equipped with new gate-arm technology that is triggered by RFID-enabled parking permits. While the majority of WashU's permit holders will not need to do anything differently when parking in these garages, a small number of permit holders who drive vehicles equipped with windshields that cannot be penetrated by RFID.

These drivers will need to hold the permit out the window to both access and exit the garage or will need to mount their permit in a specific area, which is outlined below.

Please review the list below to check if your vehicle is among these. If you are unsure whether your vehicle has this type of windshield, consult your Owners' Manual or contact the dealer where you purchased your car. This vehicle list may change.

Drivers of the following makes and models require the driver to hold the permit outside of the window to access and exit the garage:

<u>MAKE</u>	<u>MODEL</u>	<u>YEAR</u>
